**Note:** Due to the large amount of data included in most of the reports we strongly recommend that users search for a time frame of only a year or less at a time and narrow the search to only the specific bits of data desired. Asking for too much at one time will result in a confusing variety of data or, in some cases, the program will not be able to handle the request in a reasonable amount of time.

All the information available through this website was published and released by the USDA Market News Service. The site currently contains only selected data from reports released after April 1, 2001 under the Livestock Mandatory Reporting Act of 1999. There are no restrictions on who may obtain this data or how it may be used except that, if the data is re published and identified as USDA data, it cannot be altered in any way.
